Get more from your barcodes with advanced scan technology. At any computer location, this bundle will enable you to achieve any or all of the following:

- Scan part barcode, view part size and material information
- Scan part barcode, view part machining details
- Scan part barcode, change status of part
- Scan part barcode, create damaged part alert
- Scan part barcode, see product related information
- Scan part barcode, generate product label
- Scan part barcode, include in kit
- Scan part barcode, sort by cabinet
- Scan part barcode, group by part type, material or work order

- Scan nest barcode, update status of all parts in nest

- Scan product barcode, change status of product
- Scan product barcode, include in kit
- Scan product barcode, create damaged product alert
- Scan product barcode, stage into warehouse location
- Scan product barcode, load onto truck

- Scan kit barcode, change status of kit
- Scan kit barcode, load onto truck

Our processes: Remotely we install a centralized SQL database and the application on each PC. We also test ability to scan and print at applicable computers before coming onsite for integration, training, and GO LIVE. (additional licenses may easily be added at any time after initial package integration)

*Hardware and technician travel expenses are the responsibility of the customer.
